The American Clean Energy and Security Act will make a real difference for America, and my business. By jump-starting a clean energy economy, it will create demand for steel for wind turbines, energy efficient windows for new construction, and thousands of other products made in America – including innovative solar energy systems that my company makes here in Tennessee.

The American Clean Energy and Security Act will cut oil imports, create new jobs, and keep energy affordable. It’s the right choice for America.
