Last month, Congressman Patrick Murphy voted for the American Clean Energy and Security Act. It will boost clean, American-made energy and could help companies in Pennsylvania hire 72,000 more workers.*

The legislation will jump-start demand for steel for wind turbines, energy efficient windows for new construction, and thousands of other products made in America.

And it will cut oil imports by $20 billion a year. A good deal for Pennsylvania and America.

Rep. Patrick Murphy:
Thank you for Creating New Opportunities for Pennsylvania Manufacturers and Small Business

The Blue Green Alliance is a national partnership of labor unions and environmental organizations. The Blue Green Alliance includes the United Steelworkers, Communications Workers of America, Laborers’ International Union of North America, Service Employees International Union, Utility Workers Union of America, Sierra Club and Natural Resources Defense Council.
