Last month, Congressman Scott Murphy voted for the American Clean Energy and Security Act. It will boost clean, American-made energy and could help New York companies create more than 100,000 new jobs.*

The legislation will jump-start demand for steel for wind turbines, energy efficient windows for new construction, and thousands of other products made in America.

And it will cut oil imports by $20 billion a year. A good deal for New York and America.

Rep. Scott Murphy:
Thank You for Creating New Opportunities for New York Manufacturers and Small Business
