

“So I ask this Congress to send me legislation that places a market-based cap on carbon pollution and drives the production of more renewable energy in America.”

*President Obama to Congress, 2/24/09*

President Obama believes we must overhaul our oil-addicted economy and lay the foundation for a more prosperous future by putting a cap on carbon pollution. “To truly transform our economy, protect our security, and save our planet from the ravages of climate change,” he said, “we need to ultimately make clean, renewable energy the profitable kind of energy.”

A cap will create demand for steel for windmills, new windows for energy efficient buildings, LED lighting, and thousands of other products made in America. See some of the real companies that will benefit from a cap at [LessCarbonMoreJobs.org](http://LessCarbonMoreJobs.org).

CHANGE THE FUTURE FOR THE BETTER.  
CAP CARBON POLLUTION.
